

Equipment Performance Monitoring(e-PM)

- Pioneer in Equipment Performance Monitoring System (e-PM)
- Centralized Real Time Monitoring of Machine Downtime, Uptime, Utilization, MTBF, MTBA, MTTR, MTBI, OEE, Production Output
- Less Manual Data Entry or None At All
- Network Cabled or Wireless Connection
- Ready to Print Reports
- Quick Machine Information at Production & Maintenance Dashboard

EQUIPMENT PERFORMANCE MONITORING SYSTEM **E-PM**
ANOTHER INNOVATION BY IMAGINEERING TECHNOLOGY SYSTEMS, INC.

A computer based system that continuously monitor the performance of all the equipments connected to its network in **Real Time**

- Shiftly Monitoring, Recording, Query and Reports
- Monitor Machine Stoppages, MTBF, MTBA, MTBI, MTTR, Uptime, Downtime, Utilization, Efficiency, OEE and Production Output
- Including Over-all Line Performance Monitoring
- With Widescreen Production and Maintenance Dashboard

Benefits of e-PM Sheet.56

- High Data Accuracy
- Quick Information Availability
- No Delayed Reaction And Fast Response
- Less Manual Data Entry Or None At All
- Real Time Data 7/24
- Less Paperworks And Manpower
- Provide Immediate Data Facts For Engineering Analysis
- Continuous Data Storage For History Tracking/Reports
- Very Effective Solution For Maintenance Management
